### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4-1, and 12-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Honeyman et al 6,822,782; and Whitesides et al 2005/0168799.

The cited prior art discloses electrophoretic particles and the method of preparation wherein the colored or pigmented particles comprises a polymer which is crosslinked and forms a wall around the particles in a dispersion medium. The medium comprises a plurality of pigmented particles suspended in a fluid. The prior art system is

a microcapsule having features and characteristics as claimed. See column 5, line 60 through column 6, line 31; column 7, lines 1-20; column 12, lines 47-61; column 20, lines 44-68; column 21, lines 9-17; column 25, lines 47-68; column 26, lines 26-68; and column 29, lines 52 through column 30, line 25.

The '799, which has a common-inventor, and is commonly-owned with the '782, discloses an electrophoretic media comprising a medium comprising pigmented particles suspended in a fluid, said particles having a polymeric shell comprising repeat units derived from at least one monomer, the homopolymer of which is incompatible with said fluid. The encapsulated particle disclosed by the cited prior art has features and characteristics as claimed.
